Over 6 years working in UX. I'm a Product Designer made for agile teams. I work with an obsessive Passion-Driven mindset to provide desirable products for users and business. I work with multidisciplinary teams in eCommerce B2B-B2C, Finance, Banking, Insurance and Health projects. BA in Graphic Design.

Experience

Jul. 2020 - Currently

Product Designer @Chipax

The funniest project. I guess I'm leading the design of the entire company and all the products. The most exciting part of this job is trying to make a real design system.

Jul. 2020 - Currently

UI Designer @Multiplica Chile

Working with designers, POs and PMs to deliver user-centered solutions to the public site of Coopeuch. Designing interfaces and creating patterns over a UI Components Kit in Sketch-Abstract-Invision workflow.

Jul. 2019 - Abr. 2020

Product Designer @Acid Labs Chile

Collaborated with client and engineers to define the features and how many sprints for development. Conducted research, interviews, usability and guerrilla tests to define the experience and visual design of eCommerce clients like Manantial and CCU.

Mar. 2017 - Mar. 2019

Product Designer @2Brains Chile

Created a UI Kit of components to scale and optimize the increments of different products of clients like Bci Bank, Falabella Bank and Bci Insurance Brokers. Creating wireframes, storyboards, and screen flows, all the way through to the visual design. Working with PMs, POs, SMs, engineers and other designers.

2010 - 2017

Art Director, UX/UI Designer Freelance and Teacher

Working with some startups, agencies and independent designers. Producing different pieces for web, print, advertising and branding. Teacher in Graphic Design at Universidad de las Américas.
